## **DETAILED ACTION**

## Election/Restrictions

Claims 5-7, 9-28, 46 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 10, 2007. Claims 1, 2, 4, 8, and 29-45 read on the species and are examined on the merits.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 2, 4, 8, and 29-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Billoni et al. (Aeta Derm. Venereol. 2000, 80:329-334) in view of Monneret et al. (J. of Immunol., 2002, 168:3563-3569).

Art Unit: 1617

Billoni teaches expression of peroxisome proliferators-activated receptors (PPARs) in human hair follicles. The reference teaches that 15-deoxy-  $\Delta^{12,14}$  – prostaglandin J2 (15d-J2) is a potent adipogenesis inducer and PPAR–  $\gamma$  activator. The reference indicates that high clofibrate concentration (10<sup>-6</sup> M) led to cessation of hair follicle growth in vitro. See p. 333. The reference goes on to teach that an unbalanced lipid metabolism can lead to an alteration of the human hair cycle, and suggests that that this alteration is at least partially due to altered PPAR-controlled pathways.

Billoni suggests that ligands other than clofibrate, that are specific for PPAR - $\delta$  and –  $\gamma$  expressed in the human hair follicles would confirm similar results. See Discussion.

The reference does not specifically mention 15-deoxy-Δ<sup>12,14</sup> -PGD<sup>2</sup> (15d-PGD2).

Monneret teaches that PGD2 is a precursor to 15d-J2 and 15d-PGD2 is an analog of PGD2.

It would have been obvious to one of ordinary skill in the art at the time of the present invention to modify the teachings of Billoni by using 15-deoxy- $\Delta^{12,14}$ -PGD<sup>2</sup> to alter hair follicle growth in vivo because 1) Billoni teaches that a high concentration of PPAR-alpha leads to cessation of hair follicle growth in vitro, and suggest that ligands specific for PPAR - $\delta$  and - $\gamma$  would yield a similar results; 2) the reference also teaches that 15d-J2 is a PPAR- $\gamma$  activator; and 3) Monneret teaches that PGD2 is an analog of PGD2, which is a precursor to 15d-J2. Thus the skilled artisan would have expected that 15d-PGD2, the analog of its precursor would stimulate 15d-J2 and trigger the alteration of human hair growth.

Application/Control Number: 10/721,118 Page 4

Art Unit: 1617

## Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gina C. Yu whose telephone number is 571-272-8605. The examiner can normally be reached on Monday through Friday, from 8:00AM until 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
